Denis Matejcik

Full-Stack Developer — TypeScript, Go, PostgreSQL, Android, AI Agents

Slovakia, EU · Remote (worldwide) or on-site Bratislava / Trenčín · EU citizen, no sponsorship needed

Email: matejcikdenis@gmail.com · LinkedIn: linkedin.com/in/denis-matejcik · GitHub: github.com/Mild-Solvent · Portfolio: mild-solvent.github.io/CV

SUMMARY

Full-stack software developer who owns the whole stack: server, backend, frontend, mobile and deployment. Currently building gas.green, a delivery platform (TypeScript monorepo, Go services, PostgreSQL / Supabase, Android). Previously built AI agent automation and MCP integrations for B2B clients at an AI-agents startup (teamday.ai). Also ships games in Unreal Engine 5 and runs Linux / Windows server infrastructure with Docker. Prefers small teams and short release cycles.

SKILLS

Languages: TypeScript, JavaScript, Go (Golang), C#, Python, SQL, PHP, PowerShell

Frontend: React, React Native, Next.js, Vue.js, Nuxt.js, HTML, CSS

Backend & data: Node.js, Go services, REST APIs, PostgreSQL, Supabase, Firebase, web scraping, data pipelines

AI: Large Language Models (LLM), AI agents, agent workflows, Model Context Protocol (MCP), tool integrations

Mobile: Android, React Native, WebRTC, end-to-end encryption (E2EE)

DevOps & infrastructure: Docker, Linux, Windows Server, Git, GitHub, GitHub Actions, Google Cloud Platform (GCP), Tailscale

Games: Unreal Engine 5 (UE5), level design, puzzle design

Other: SEO, monorepos, Windows APIs

EXPERIENCE

Full-Stack Developer — gas.green

Jan 2024 – Present · Slovakia / Remote

- Build a delivery platform that connects customers, couriers and businesses: ordering, dispatch, live tracking, courier app and business dashboard.
- Develop in a TypeScript monorepo with Go backend services and PostgreSQL / Supabase; ship Android builds of the courier app.
- Joined when the product was a landing page and grew it into a working platform across web and mobile.

Senior Software Development Engineer — teamday.ai

Jun 2025 – Sep 2025 · Bratislava, Slovakia

- Built AI agent workflows that automate business processes for B2B clients.
- Integrated LLMs with external tools and data through Model Context Protocol (MCP) servers, scrapers and data pipelines.
- Wrote the glue code that makes an LLM agent actually finish a job instead of describing it.

Web Developer & IT — ceaeurope.sk (CEA Europe)

2017 – 2025 · Nová Dubnica, Slovakia

- Built and maintained the company website and product catalogue for a promotional-goods and corporate-events business (TypeScript, Next.js, PHP integrations).
- Built aktivity.ceaeurope.sk, a bike, running and hiking trail guide with searchable routes and mobile maps (Vue.js, PostgreSQL, map tiles), live and in use.
- Deployed an AI sales agent; handled enquiry forms, integrations, IT support and graphics.

PROJECTS

vkozi.com — Client website (2026)

Website and B2B catalogue for MAXIM 74, a Slovak leather manufacturer: product catalogue, brand story, enquiry flow, SEO.

DAB — Android app (2026)

Peer-to-peer friends map: location, chat and calls go phone to phone over WebRTC with end-to-end encryption and offline map tiles. No server, no accounts.

Experiment Echo — Unreal Engine 5 game (2026)

About two hours of underwater environmental puzzles, playing as a mind-controlled sea slug. Level and puzzle design in UE5. mild-solvent.github.io/experiment-echo

Idle Master — Windows utility (2026)

Small C# tool that keeps a machine awake without wasting RAM, using Windows APIs and PowerShell.

Homelab & infrastructure (ongoing)

Remote desktop servers, a home cloud, Docker containers, Tailscale networking, Android tooling and PowerShell automation on Windows and Linux.

EDUCATION

Computer Science — Middlesex University, London, United Kingdom

Mechatronics — Secondary Technical School (SPŠ), Dubnica nad Váhom, Slovakia — maturita

CERTIFICATIONS

EU open-category A1/A3 UAS remote pilot (drones)

LANGUAGES

English (C2), Slovak (native), Czech (B2)
